

# Addition with base 10 blocks (tens and ones)

Draw blocks to solve the addition questions.

$42 + 21 =$

$$= \begin{array}{l} \underline{\quad} \text{ tens} \\ \underline{\quad} \text{ ones} \end{array} = \underline{\quad}$$

$51 + 11 =$

$$= \begin{array}{l} \underline{\quad} \text{ tens} \\ \underline{\quad} \text{ ones} \end{array} = \underline{\quad}$$

$20 + 34 =$

$$= \begin{array}{l} \underline{\quad} \text{ tens} \\ \underline{\quad} \text{ ones} \end{array} = \underline{\quad}$$

$57 + 12 =$

$$= \begin{array}{l} \underline{\quad} \text{ tens} \\ \underline{\quad} \text{ ones} \end{array} = \underline{\quad}$$

Example:  $25 + 12 =$

$$= \begin{array}{l} \underline{3} \text{ tens} \\ \underline{7} \text{ ones} \end{array} = \underline{37}$$
