

1/2 Completing a whole number (improper fractions)

Find the missing fraction:

1) $\frac{3}{6} + \underline{\hspace{2cm}} = 1$

2) $\frac{7}{2} + \underline{\hspace{2cm}} = 6$

3) $\frac{3}{2} + \underline{\hspace{2cm}} = 2$

4) $\frac{4}{6} + \underline{\hspace{2cm}} = 2$

5) $\frac{11}{7} + \underline{\hspace{2cm}} = 3$

6) $\frac{1}{3} + \underline{\hspace{2cm}} = 1$

7) $\frac{12}{5} + \underline{\hspace{2cm}} = 4$

8) $\frac{10}{8} + \underline{\hspace{2cm}} = 2$

9) $\frac{4}{3} + \underline{\hspace{2cm}} = 5$

10) $\frac{11}{7} + \underline{\hspace{2cm}} = 3$

11) $\frac{9}{2} + \underline{\hspace{2cm}} = 6$

12) $\frac{12}{11} + \underline{\hspace{2cm}} = 2$

13) $\frac{10}{3} + \underline{\hspace{2cm}} = 7$

14) $\frac{1}{6} + \underline{\hspace{2cm}} = 2$

15) $\frac{5}{2} + \underline{\hspace{2cm}} = 8$

16) $\frac{2}{8} + \underline{\hspace{2cm}} = 1$

Completing a whole number (improper fractions)

Find the missing fraction:

1) $\frac{7}{2} + \underline{\hspace{2cm}} = 8$

2) $\frac{5}{7} + \underline{\hspace{2cm}} = 1$

3) $\frac{4}{3} + \underline{\hspace{2cm}} = 4$

4) $\frac{11}{6} + \underline{\hspace{2cm}} = 2$

5) $\frac{5}{4} + \underline{\hspace{2cm}} = 3$

6) $\frac{4}{3} + \underline{\hspace{2cm}} = 3$

7) $\frac{9}{2} + \underline{\hspace{2cm}} = 9$

8) $\frac{8}{3} + \underline{\hspace{2cm}} = 4$

9) $\frac{2}{4} + \underline{\hspace{2cm}} = 1$

10) $\frac{7}{3} + \underline{\hspace{2cm}} = 5$

11) $\frac{5}{11} + \underline{\hspace{2cm}} = 1$

12) $\frac{8}{3} + \underline{\hspace{2cm}} = 6$

13) $\frac{3}{5} + \underline{\hspace{2cm}} = 3$

14) $\frac{12}{3} + \underline{\hspace{2cm}} = 7$

15) $\frac{12}{7} + \underline{\hspace{2cm}} = 2$

16) $\frac{11}{2} + \underline{\hspace{2cm}} = 8$

1/2 Completing a whole number (improper fractions)

Find the missing fraction:

1) $\frac{3}{10} + \underline{\hspace{2cm}} = 1$

2) $\frac{5}{8} + \underline{\hspace{2cm}} = 1$

3) $\frac{4}{5} + \underline{\hspace{2cm}} = 2$

4) $\frac{1}{4} + \underline{\hspace{2cm}} = 2$

5) $\frac{3}{4} + \underline{\hspace{2cm}} = 3$

6) $\frac{2}{5} + \underline{\hspace{2cm}} = 2$

7) $\frac{1}{2} + \underline{\hspace{2cm}} = 4$

8) $\frac{3}{5} + \underline{\hspace{2cm}} = 2$

9) $\frac{1}{2} + \underline{\hspace{2cm}} = 6$

10) $\frac{1}{2} + \underline{\hspace{2cm}} = 4$

11) $\frac{2}{3} + \underline{\hspace{2cm}} = 5$

12) $\frac{3}{4} + \underline{\hspace{2cm}} = 1$

13) $\frac{10}{11} + \underline{\hspace{2cm}} = 2$

14) $\frac{1}{2} + \underline{\hspace{2cm}} = 2$

15) $\frac{4}{5} + \underline{\hspace{2cm}} = 2$

16) $\frac{3}{4} + \underline{\hspace{2cm}} = 1$

1 2 Completing a whole number (improper fractions)

Find the missing fraction:

1) $\frac{3}{4} + \underline{\hspace{2cm}} = 2$

3) $\frac{6}{9} + \underline{\hspace{2cm}} = 2$

5) $\frac{1}{2} + \underline{\hspace{2cm}} = 1$

7) $\frac{4}{7} + \underline{\hspace{2cm}} = 2$

9) $\frac{6}{7} + \underline{\hspace{2cm}} = 1$

11) $\frac{2}{3} + \underline{\hspace{2cm}} = 3$

13) $\frac{3}{5} + \underline{\hspace{2cm}} = 2$

15) $\frac{1}{3} + \underline{\hspace{2cm}} = 3$

2) $\frac{1}{2} + \underline{\hspace{2cm}} = 5$

4) $\frac{1}{3} + \underline{\hspace{2cm}} = 4$

6) $\frac{2}{5} + \underline{\hspace{2cm}} = 3$

8) $\frac{3}{4} + \underline{\hspace{2cm}} = 2$

10) $\frac{2}{5} + \underline{\hspace{2cm}} = 1$

12) $\frac{3}{4} + \underline{\hspace{2cm}} = 2$

14) $\frac{9}{10} + \underline{\hspace{2cm}} = 2$

16) $\frac{2}{12} + \underline{\hspace{2cm}} = 1$
