

Completing a whole number (mixed numbers)

Find the missing fraction:

1) $5\frac{6}{8} + \underline{\hspace{2cm}} = 7$

2) $3\frac{1}{2} + \underline{\hspace{2cm}} = 7$

3) $5\frac{2}{5} + \underline{\hspace{2cm}} = 8$

4) $6\frac{4}{7} + \underline{\hspace{2cm}} = 10$

5) $4\frac{3}{6} + \underline{\hspace{2cm}} = 9$

6) $1\frac{8}{9} + \underline{\hspace{2cm}} = 3$

7) $4\frac{2}{8} + \underline{\hspace{2cm}} = 6$

8) $2\frac{4}{8} + \underline{\hspace{2cm}} = 4$

9) $2\frac{5}{7} + \underline{\hspace{2cm}} = 5$

10) $3\frac{1}{4} + \underline{\hspace{2cm}} = 6$

11) $2\frac{6}{7} + \underline{\hspace{2cm}} = 4$

12) $2\frac{2}{6} + \underline{\hspace{2cm}} = 5$

13) $2\frac{4}{5} + \underline{\hspace{2cm}} = 6$

14) $4\frac{1}{5} + \underline{\hspace{2cm}} = 9$

15) $3\frac{1}{3} + \underline{\hspace{2cm}} = 6$

16) $3\frac{3}{4} + \underline{\hspace{2cm}} = 8$

Completing a whole number (mixed numbers)

Find the missing fraction:

1) $5\frac{6}{8} + \underline{\hspace{2cm}} = 7$

2) $1\frac{3}{4} + \underline{\hspace{2cm}} = 3$

3) $5\frac{2}{5} + \underline{\hspace{2cm}} = 8$

4) $1\frac{4}{6} + \underline{\hspace{2cm}} = 5$

5) $4\frac{3}{6} + \underline{\hspace{2cm}} = 8$

6) $2\frac{8}{12} + \underline{\hspace{2cm}} = 10$

7) $4\frac{2}{8} + \underline{\hspace{2cm}} = 6$

8) $2\frac{4}{8} + \underline{\hspace{2cm}} = 6$

9) $2\frac{5}{7} + \underline{\hspace{2cm}} = 5$

10) $3\frac{1}{4} + \underline{\hspace{2cm}} = 10$

11) $3\frac{6}{7} + \underline{\hspace{2cm}} = 7$

12) $2\frac{2}{6} + \underline{\hspace{2cm}} = 8$

13) $2\frac{4}{5} + \underline{\hspace{2cm}} = 4$

14) $4\frac{1}{5} + \underline{\hspace{2cm}} = 9$

15) $1\frac{1}{3} + \underline{\hspace{2cm}} = 4$

16) $3\frac{3}{4} + \underline{\hspace{2cm}} = 7$

Completing a whole number (mixed numbers)

Find the missing fraction:

1) $3\frac{1}{3} + \underline{\hspace{2cm}} = 6$

2) $7\frac{1}{2} + \underline{\hspace{2cm}} = 10$

3) $2\frac{1}{2} + \underline{\hspace{2cm}} = 4$

4) $6\frac{5}{7} + \underline{\hspace{2cm}} = 9$

5) $1\frac{5}{6} + \underline{\hspace{2cm}} = 3$

6) $2\frac{9}{12} + \underline{\hspace{2cm}} = 7$

7) $3\frac{1}{4} + \underline{\hspace{2cm}} = 6$

8) $3\frac{4}{5} + \underline{\hspace{2cm}} = 7$

9) $2\frac{1}{4} + \underline{\hspace{2cm}} = 9$

10) $3\frac{2}{10} + \underline{\hspace{2cm}} = 9$

11) $5\frac{1}{3} + \underline{\hspace{2cm}} = 8$

12) $3\frac{3}{4} + \underline{\hspace{2cm}} = 7$

13) $5\frac{2}{3} + \underline{\hspace{2cm}} = 9$

14) $2\frac{3}{5} + \underline{\hspace{2cm}} = 4$

15) $4\frac{5}{6} + \underline{\hspace{2cm}} = 7$

16) $4\frac{2}{11} + \underline{\hspace{2cm}} = 6$

Completing a whole number (mixed numbers)

Find the missing fraction:

1) $1\frac{4}{6} + \underline{\hspace{2cm}} = 3$

2) $2\frac{11}{12} + \underline{\hspace{2cm}} = 4$

3) $2\frac{1}{6} + \underline{\hspace{2cm}} = 4$

4) $1\frac{1}{3} + \underline{\hspace{2cm}} = 5$

5) $4\frac{2}{3} + \underline{\hspace{2cm}} = 6$

6) $3\frac{6}{8} + \underline{\hspace{2cm}} = 5$

7) $5\frac{1}{2} + \underline{\hspace{2cm}} = 7$

8) $4\frac{1}{2} + \underline{\hspace{2cm}} = 10$

9) $3\frac{1}{3} + \underline{\hspace{2cm}} = 7$

10) $6\frac{1}{3} + \underline{\hspace{2cm}} = 14$

11) $5\frac{1}{2} + \underline{\hspace{2cm}} = 8$

12) $4\frac{4}{8} + \underline{\hspace{2cm}} = 9$

13) $6\frac{1}{3} + \underline{\hspace{2cm}} = 9$

14) $5\frac{5}{6} + \underline{\hspace{2cm}} = 7$

15) $7\frac{1}{3} + \underline{\hspace{2cm}} = 10$

16) $1\frac{4}{11} + \underline{\hspace{2cm}} = 4$
